1 Basic information

1.1 Description of the control

A chart is a chart with the option of defining a data source using a single aggregation query, or a chart with the option of defining a maximum of four common queries without using data aggregation.

1.2 Create a new control

A new chart can be created as follows from the edit form using the toolbar with controls:

- First, the position in which the new chart is to be placed is determined by clicking the mouse in the edit form. This will highlight the selected position with a gray horizontal line. Then just click on the “Chart” item in the toolbar of the edit form, fill in the attributes of the new control in the newly opened dialog, and then save. This will insert a new chart at a pre-selected location on the edit form.
- If the required position is not determined before inserting a new chart, the new chart will be inserted at the end of the edit form.

1.3 Edit or delete a control

- For each existing control, a pencil icon appears on the left side of the edit form to change or delete the control's settings.
- Individual controls can be moved vertically in the edit form using the Drag&Drop method. Moving consists of grabbing the control, preferably behind its name located in the left column of the edit form, and then dragging it to the desired position in the edit form.
- For security reasons, it is important to have the function of moving controls enabled using the “Drag&Drop” check box located above the toolbar with controls. This field is unchecked each time you log in to the application.

2 List of tabs in the control settings dialog

General	Setting general properties
Chart A	Setting the displayed data using the first query
Chart B	Setting the displayed data using the second query
Chart C	Setting the displayed data using the third query
Chart D	Setting the displayed data using the fourth query
Other	Color and font settings
Rights	Rights settings
Administration	Setting other properties

2.1 “General” tab

General	Chart A	Chart B	Chart C	Chart D	Other	Rights
<p>Title <input type="text"/> <i>Dictionary...</i></p> <p>Width <input type="text"/> px <i>10 - 10 000px</i></p> <p>Height <input type="text"/> px <i>10 - 10 000px</i></p> <p>Options</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Show legend <ul style="list-style-type: none"> <input type="text" value="Right"/> ▾ <input checked="" type="checkbox"/> Show labels <input type="checkbox"/> Show tooltip <input checked="" type="checkbox"/> Show grid <input type="checkbox"/> Automatic interval of labels on the X-axis <input checked="" type="checkbox"/> 3D Chart <ul style="list-style-type: none"> <input type="text" value="30°"/> ▾ <input type="checkbox"/> Right-angled <i>Perspective</i> 						
<input type="button" value="Save"/> <input type="button" value="Delete"/>						

2.1.1 Title

- The name of the control displayed at the top of the chart image.

2.1.2 Dictionary

- The dictionary lists the names of other controls, forms, view pages, categories, applications, and application groups used across the entire application.
- The dictionary search is used to design the correct control name and to maintain the consistency of the nomenclature throughout the application so that controls with the same meaning located in different places in the application are named in the same way.

2.1.3 Width

- The width of the control, expressed in pixels.
- If you do not fill in this input field, the width of the chart will be set to the maximum width of the screen.

2.1.4 Height

- The height of the control, expressed in pixels.
- If you do not fill in this input field, the height of the chart will be set to 460 pixels.
- For bar charts, a height entered between 1 and 50 pixels indicates the height of one bar.

2.1.5 Options

- **Show legend**
 - Checking this box determines whether the legend for each chart series should be displayed.
 - The drop-down list contains the following values:
 - **Right**
 - **Left**
 - **Up**
 - **Down**
- **Show labels**
 - Checking this box determines whether to display numeric values in the chart.
- **Show tooltip**
 - Checking this box determines whether the chart should display the details of individual records in the tooltip when hovering the mouse over individual values.
- **Show grid**
 - Checking this box determines whether to display a grid highlighting the intervals of values on the X and Y axis.
- **Automatic interval of labels on the X-axis**
 - Checking this box determines whether the X-axis label placement interval should be evaluated automatically.
- **3D Chart**
 - Checking this box determines whether the chart should be displayed from a perspective view, with the option to select the view angle and rectangular perspective.

2.2 “Chart A” tab

General **Chart A** Chart B Chart C Chart D Other Rights

Name Legend

Data source **New query**

Y

X

Type

Save Delete

- Definition of the first series of charts.

2.2.1 Name

- The name of the legend of the first series of the chart.

2.2.2 Data source

- The data source defines the source database records displayed in the first series of the chart.
- Data source settings are made in the chartical designer of database queries. A detailed description of the database query designer is provided in the separate “Database Query Designer” guide.

2.2.3 Y

- Select a column that specifies a value on the Y axis.

2.2.4 X

- Select a column that specifies a descriptive value on the X axis.

2.2.5 Type

- A chart type that allows you to select one of the following values:
 - Column
 - Stacked column
 - Bar
 - Stacked bar
 - Line
 - Spline

- **Step line**
- **Area**
- **Spline area**
- **Stacked area**
- **Pie**
- **Doughnut**
- **Point**
- **Bubble**

2.3 “Chart B” tab

General	Chart A	Chart B	Chart C	Chart D	Other	Rights
---------	---------	----------------	---------	---------	-------	--------

Name	<input type="text"/>	<i>Legend</i>
Data source	New query	
Y	<input type="text"/>	
X	<input type="text"/>	
Type	<input type="text" value="Area"/>	<input type="text"/>

- Definition of the second series of charts.

2.4 “Chart C” tab

General	Chart A	Chart B	Chart C	Chart D	Other	Rights
---------	---------	---------	----------------	---------	-------	--------

Name	<input type="text"/>	<i>Legend</i>
Data source	New query	
Y	<input type="text"/>	
X	<input type="text"/>	
Type	<input type="text" value="Area"/>	

Save	Delete
-------------	---------------

- Definition of the third series of charts.

2.5 “Chart D” tab

General	Chart A	Chart B	Chart C	Chart D	Other	Rights
---------	---------	---------	---------	----------------	-------	--------

Name	<input type="text"/>	<i>Legend</i>
Data source	New query	
Y	<input type="text"/>	
X	<input type="text"/>	
Type	<input type="text" value="Area"/>	

- Definition of the fourth series of charts.

2.6 “Other” tab

General	Chart A	Chart B	Chart C	Chart D	Other	Rights
Color palette <input type="text" value="Pastel"/>						
Font name <input type="text" value="Tahoma"/>						
Font size <input type="text" value="10"/> <i>Title</i>						
<input type="text" value="10"/> <i>Legend, values</i>						
						Save
						Delete

2.6.1 Color palette

- Chart color palette that allows you to select one of the following values:
 - **Default**
 - **Earth tones**
 - **Berry**
 - **Chocolate**
 - **Excel**
 - **Fire**
 - **Sea green**
 - **Transparent**
 - **Pastel**
 - **Gray scale**
 - **Light**
 - **None**

2.6.2 Font name

- The font name used to display label texts, legends, and values in the chart.

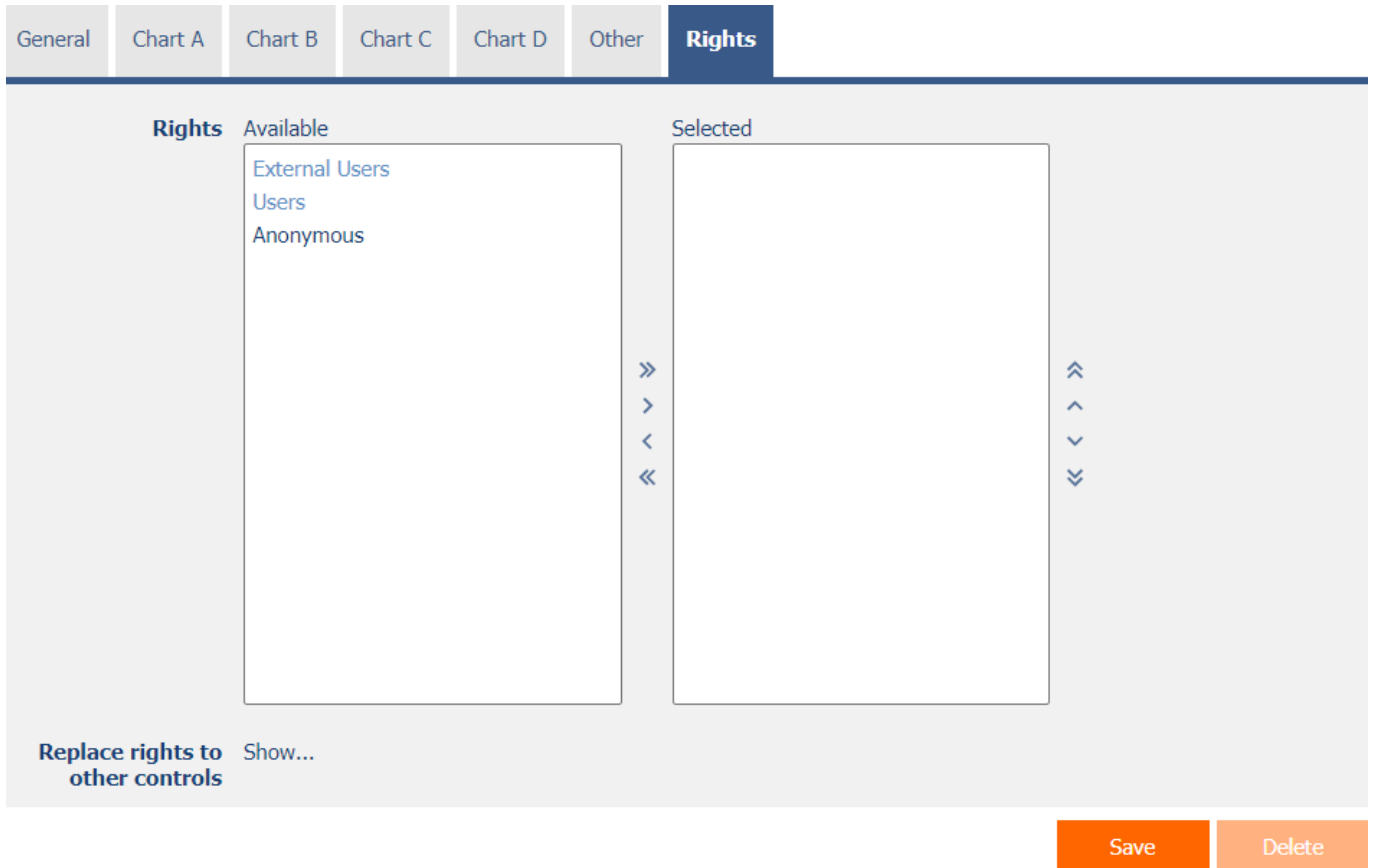

2.6.3 Font size – Title

- The text size used to display headings.

2.6.4 Font size – Legend, values

- The text size used to display legends and values in the chart.

2.7 “Rights” tab

General Chart A Chart B Chart C Chart D Other **Rights**

Replace rights to other controls Show...

Save Delete

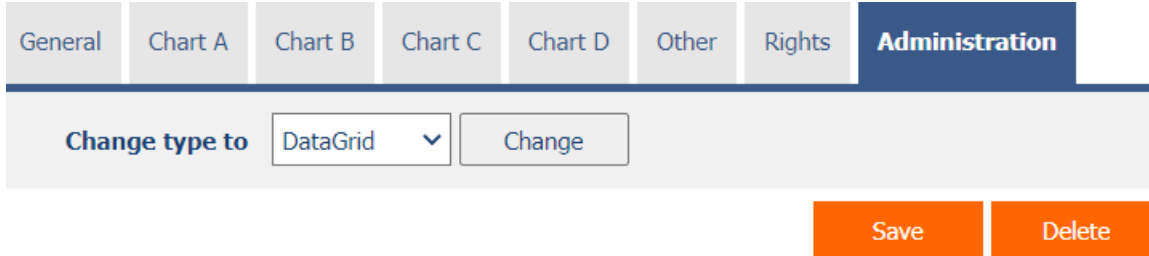

2.7.1 Rights

- Rights define a list of user groups and users who have permission to view the control on the edit form.

2.7.2 Replace rights to other controls

- The “Replace rights to other controls” function is used to unify the rights within the entire edit form for controls that are related in terms of rights.
- Thanks to the “Show...” link, it is possible to display a list of all controls in the edit form, including setting the rights of these controls. For each control, a check box is displayed that allows you to select the control. When you save a control, the same rights are then set for those selected controls.
- An alternative for unifying rights within the entire edit form is to display the report available from the “Subordinate object rights” tab in the edit form settings.

2.8 “Administration” tab

The screenshot shows a navigation bar with tabs: General, Chart A, Chart B, Chart C, Chart D, Other, Rights, and Administration (which is highlighted in dark blue). Below the tabs is a form area with the text "Change type to" followed by a dropdown menu showing "DataGrid" and a "Change" button. To the right of this form are two orange buttons: "Save" and "Delete".

- The “Administration” tab is only displayed for existing controls.

2.8.1 Change type to

- The drop-down list offers the types of controls to which conversion of the control is supported.
